Formal Review Template

Requester Name: Leo Andrews
Reviewer Name: Jazmin Gilliam
Date of Review: 03/03/2026

Review Type (e.g., code, usability, design, other): Design

Scope:

Artifact Reviewed: Task 24: Create AssessmentSession Controller (Documentation)

documentation/ implementation

Review Objectives:

Review readability and understanding of documentation.

-1. What is being done?

-2. How is it being done?

-3. Why is it being done?

-4. What code artifacts are being touched?

-5. How will this be tested?

-6. Is documentation like this useful?

-7. Would you like to see documentation like this more often?

Methodology:

Approach Taken (e.g., execute, inspect, observe): _____Inspect_

Evaluation Criteria (e.g., expected behavior, best practices, heuristic evaluation): _Heuristic_

Coverage / Limitations (e.g., test login only, ignore database integration): N/a

Findings

Strengths:

- The functionality for CRUD operations were done really well. I like how the functionality

for admin users and regular have separate routes rather than routed together messily. This way there's no chance of a regular user accessing any admin privileges

- Having flash messages for the user updates is very helpful as well.

Issues / Defects:

Description of Issue	Severity (Low/Med/High)	Evidence / Example	Suggested Fix
Routes	high	errors	Merge conflicts
Having more test cases	low	Just to ensure all components work properly just to decrease hours of debugging
