Formal Review

Requester Name: Jazsmin_Gilliam
Reviewer Name: Leo Andrews

Date of Review: __03/31/2026

Review Type (e.g., code, usability, design, other): Code

Scope:

Artifact Reviewed: Updated Code and UI for User profile

Review Objectives: Evaluate the creativity and code practices

Methodology:

Approach Taken (e.g., execute, inspect, observe): Inspect the presented file.

Evaluation Criteria (e.g., expected behavior, best practices, heuristic evaluation):

- Readability: Is everything on the page readable? Everything is readable and structured well. No Issues there
- Feedback: What would you add/change to the frontend if anything? Any redundant code? I would be careful with the amount of functions being called and try to keep the functions simple REST api calls. There is some redundancy with the Nav Bar this could be defined in its own file and imported.

Engaging: Is the homepage appealing/ engaging for the user? What works? What do you think needs improving? It's good I would look into making the individual elements larger and maybe something in the background to brighten it up.

Coverage / Limitations (e.g., test login only, ignore database integration): Ignore any attempts to integrating the database and styling; still working on finishing that up.: Still a Mockup No Backend

---

Findings

Strengths:

- Well written code.
- Attractive front end

Issues / Defects:

Description of Issue	Severity (Low/Med/High)	Evidence / Example	Suggested Fix
Code Redunency	Low	NavBar	Separate and Import
