Formal Review Template

Requester Name: Ibrahim Malik
Reviewer Name: Bret Anderson
Date of Review: 3/31/26

Review Type (e.g., code, usability, design, other): Code + Usability

Scope:

Artifact Reviewed:

Code files: (Chatbot, HealthTracker, and Healthtrends)

Review Objectives:

Ensure that has good UX/UI experience, with structured scalable code.

Methodology:

Approach Taken (e.g., execute, inspect, observe): Inspected and Executed chatbot and code.

Evaluation Criteria (e.g., expected behavior, best practices, heuristic evaluation): Expected behavior of chatbot and healthtracker

Coverage / Limitations (e.g., test login only, ignore database integration): Test chatbot, browser healthtracker and see how that gets updated, view healthtrends

Findings

Strengths:

- I like how work between frontend and backend was divided between different folders, great practice for scalability
- Each page is separated in its own folder - makes it easy to understand and scale
- UI is very clean and looks modern - love that it isn't like typical boring plain health apps

Issues / Defects:

Description of Issue	Severity (Low/Med/High)	Evidence / Example	Suggested Fix

Overly persistent History for Chatbot	Medium	Chatbot logs	Only save per section
Must stay on chatbot while response generating	Low	I left the chat tab and response stopped generating	Maybe Cache certain prompts?
