Review Type (e.g., code, usability, design, other): Design

Scope:

Artifact Reviewed:
React planning documentation for page implementation

Review Objectives:
Ensure the intended implementation follows good convention

Methodology:

Approach Taken (e.g., execute, inspect, observe): Reviewed the React planning documentation and evaluated the proposed design structure.
Evaluation Criteria (e.g., expected behavior, best practices, heuristic evaluation): checking design clarity, and adherence to common UI/UX best practices.

Coverage / Limitations (e.g., test login only, ignore database integration):Focused on the design plan and architecture only, no actual things created yet. (Not much to give feedback on)

Findings

Strengths:

- The proposal of interactive UI could create a nice user experience.
- The document clearly outlines the website's flow which is a good start.

Issues / Defects:

Description of Issue	Severity (Low/Med/High)	Evidence / Example	Suggested Fix
Some design ideas may impact performance if not optimized properly	Low to Medium	Document proposes zooming interfaces and animations for navigation	Evaluate whether these features are necessary
